

# AMI KIDS

AMIkids is a national youth-serving organization that provides individualized services through its Personal Growth Model™ to support youth. AMIkids introduces young people to opportunities that help them thrive in their homes, schools, and communities. Service delivery ranges from prevention to day treatment to residential programming and is enhanced through experiential education opportunities – a hallmark of our programming since our founding.

In the past 55 years, the organization has empowered over **169,000** youth to discover their true potential and become confident, successful adults. In 2024, AMIkids served youth across **250 counties in eight states at 52 unique programs.**

of youth used a positive coping strategy during a recent challenging situation

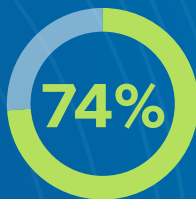

of youth created education or career plans for the future

of youth successfully met their goals or completed the available programming

of youth did not offend or reoffend while participating in services

of youth remained crime-free

# COMMUNITY-BASED PROGRAMS

**Juvenile Justice Day Treatment** programs provide intensive supervision and programming for youth referred primarily due to delinquency. Behavior and skills training, education, and treatment services are provided five days per week, typically three to eight hours daily.

**Alternative Education** programs are designed to help students who require additional support not available in traditional schools. Students in attendance benefit from academic remediation, positive behavioral skills development, and individualized attention for success. AMIkids Alternative Education programs include Infinity Schools, School-within-a-School, and Charter Schools, which operate according to the school district schedule.

**Charter Schools** are public schools designed to offer students unique experiences centered around the ocean being the classroom. In addition to academic studies, students are exposed to multiple aspects of marine-focused careers, as they develop into future leaders and responsible stewards of our environment.

**After School Programs** offer a variety of activities such as tutoring, career readiness, and technical training to students during after-school hours. AMIkids After School programs provide students with comprehensive programming and support services to engage youth in positive opportunities that prepare them for success.

**Prevention Programs** provide life management skills training, educational services, and youth development activities designed to prevent entry or further involvement in the juvenile justice and/or child welfare systems.

**Family Services Programs** provide home-based skills building and/or family counseling and intervention using evidence-based practices. Family services may include program models such as Functional Family Therapy, Wraparound Services, and the AMIkids Family Centric Model. Family Services programs last approximately two to six months.

**Pre-Apprenticeship Programs** provide career exploration and workforce development opportunities for students aged 16-24, equipping them with the skills needed for successful careers. These programs offer industry-specific training tailored to each community's demand for skilled workers. Through a combination of academic, technical, and job readiness courses, along with individualized case management, AMIkids prepares and places students into higher education, jobs, and apprenticeships.

# RESIDENTIAL PROGRAMS

These programs operate 24 hours per day, seven days per week, with youth residing on campus. Staff implement trauma-informed programming to help youth develop skills for successfully transitioning to community settings and/or the home environment.

**Juvenile Justice with or without mental health and/or substance use treatment programs** provide 24-hour rehabilitative care for youth referred primarily due to delinquency. These programs may include treatment services for youth with mental health and/or substance abuse conditions.

**Specialized Therapeutic Programs** provide 24-hour psychotherapeutic rehabilitative care for youth with severe behavioral, psychological, or emotional problems. Services are provided by a multi-disciplinary treatment team including clinical staff members.

**Child Welfare Group Care Programs** provide a 24-hour group living setting for youth requiring a structured out-of-home care placement.

# PROGRAM ENHANCEMENTS

These services provide specialized support that can operate independently or complement existing programs, enhancing resources for youth and families. They include **Career & Technical Education featuring the AMIkids Career Exploration Model and Workforce Development Model; AMIkids Family Centric Model (FCM); Functional Family Therapy (FFT); AMIkids WINGS; Wraparound Services; and Behavioral Health.**

Empowering young people to discover their true potential.
